## Patient Feedback for Dr Tarique Parwez

GMC number: 4465261

Number of completed responses: 20

Report released to doctor: 17 January 2020

***Private and Confidential***

# Introduction

## Multi-source feedback report

The L2P multi-source feedback is based on the extensive research done by the GMC in preparation for Revalidation. The GMC colleague and patient questionnaires have been found to map well onto the competencies required for 'Good Medical Practice'.

For a full review and references of the work undertaken on behalf of the GMC and the findings of the research led by the Primary Care Research Group, Peninsula College of Medicine and Dentistry, Exeter, please see GMC Multi-Source Feedback Questionnaires - Interpreting and handling multisource feedback results: Guidance for appraisers. This will give the background to the work underpinning the MSF process for you and your MSF facilitator and help you interpret and handle the MSF results (Chapter 5 onwards).

"It is important to remember that MSF results are intended to be formative in nature, rather than summative. For the purposes of revalidation, and within the formal appraisal process, the MSF results should be considered alongside the full range of other evidence that the doctor collects during each five-year revalidation cycle.

"In relation to self-assessment questionnaires, recent literature suggests that supported self-reflection on feedback evidence is a valuable element of self-directed professional development and that disagreement with negative feedback can affect the likelihood that doctors will act on such feedback."

Campbell, Wright 2012

## GMC patient questionnaire (PQ)

The GMC patient questionnaire comprises 9 core items which assess the doctor's consultation skills and aspects of their probity. Other items collect information about the context in which the questionnaire has been completed and about the patient.

## Understanding the data

The tables show you the percentage of respondents who expressed an opinion for a particular question. Some questions have an option to answer 'Does not apply' or 'Don't know' - these answers are not counted in the percentages.

Where questions are optional, the tables show you the percentage of respondents who answered that question, which may be fewer than the total number of respondents.

## Patient feedback

Who are you filling in this questionnaire for?

Yourself	90%
Your child	10%
Your spouse or partner	0%
Another relative or friend	0%

Which of the following best describes the reason you saw the doctor today?

To ask for advice	0%
Because of an ongoing problem	58%
For treatment (including prescriptions)	11%
Because of a one-off problem	0%
For a routine check	21%
Other - please give details	11%

<b>Other answers:</b> show 2 other answers hide 2 other answers
Surgery
Broken arm

How important to your health and wellbeing was your reason for visiting the doctor today?

1 - not very important	0%
2	0%
3	5%
4	15%
5 - very important	80%

**How good was your doctor today at each of the following?**

No	0%

**I would be completely happy to see this doctor again**

Yes	100%
No	0%

**Was this visit with your usual doctor?**

Yes	53%
No	47%

**Please describe any ways the doctor could have improved your experience today.**

No issues excellent treatment

None - very happy

No improvement needed. He was excellent

I was very happy with my consultation

**Please add any other comments you want to make about this doctor.**

Best ever x-ray explanation given knee support taken to physio all on one app

Mr Parwez explained things very clearly & made me feel more confident about the progress I could expect & the time & extent of recovery.

I found Mr Parwez very helpful

Good doctor made me feel at ease

Polite and helpful

This doctor will keep information about me confidential	4.71	5.00	4.67
This doctor is honest and trustworthy	4.68	5.00	4.72

### L2P National Patient Questionnaire Benchmark

The L2P national patient benchmark data is derived from a combination of anonymised patient MSF responses from all L2P clients and the GMC data from Wright C, Academic Medicine 2012 ([www.ncbi.nlm.nih.gov/pubmed/23095930](http://www.ncbi.nlm.nih.gov/pubmed/23095930)). The benchmarks are recalculated every month to use the latest figures.
